Breen Plumbing has a proud history of servicing South Canterbury's plumbing needs since 1997.

Breen Plumbing is a family owned and operated business with experience in all aspects of plumbing, gas fitting and drainlaying - we specialise in residential and commercial plumbing.

### Plumbing

Breen Plumbing has a team specialising in all commercial plumbing activities. We offer plumbing repairs and preventive maintenance programmes to keep your company functioning and can provide sophisticated, creative and practical design solutions. We respond quickly to any unforeseen system failures. We also offer IQP and backflow prevention. Design services include water supply, heating systems, storm water & sewer drainage, solar water heating, rainwater collection, septic tank and gas supply systems to name a few.

### Gasfitting

Breen Plumbing install all commercial gas services including gas infinity units, gas heating systems, and can maintain and repair all gas systems. This includes gas heating that range from heating for sheds and offices to large dryers for seed to processing plants. Breen Plumbing gasfitters are efficient in providing servicing and repairs on all appliance installation. All gas work is tested for your safety and certified as required.

### Drainlaying

We install commercial and residential drainage. We provide comprehensive maintenance and repair services for all drainage. These include replacing existing drains, unblocking with our hydrojet water blaster, removing roots with our drain root cutter and video drains to ascertain their condition - saving you time and money. Whether its sewer or storm water drains in need of laying or repair, quality workmanship is guaranteed. We have experience in factory drainage, design, manholes, pump chambers, and retention tanks just to name a few. We offer a service where we can identify the fault, design a solution, repair the problem quickly having your drain functioning promptly again.

### Roofing & Spouting

Breen Plumbing can help with all your commercial roofing jobs. We offer new roofs, re-roofs, repairs, spouting and downpipes, membrane roofing, skylights and Solatube systems. We use a full range of roofing material including rubber membranes and water proof applications. We also install Solatubes - a day lighting system for adding natural light to dark spaces. Solatube has a commercial series that will brighten your workplace and also has mechanical ventilation products for moisture laden spaces.

### Supporting our service we have:

- Comprehensive health and safety programs.
- Certifying (Master) and licensed plumbers, drainlayers and gasfitters.
- IQP and backflow qualifications.

Breen Plumbing have an extensive range of equipment to deal with all your plumbing and drainage issues:

Diggers  
Tip trucks  
Access equipment  
Rigid drain camera  
Rigid drain machine  
Drain jetting machine  
Water blasters  
Sucker truck  
Vacuum truck
